

HANDEMAN Xtra® PORTABLE HAND WASH

The Handeman is designed for hand washing under running water from its spray nozzle. It can be filled with approximately 3.3 litres of hot water for hand washing only (45C).

The waste water is contained in the Waste Safe bowl. When full water appears in the drain holes when opened and the bowl is lifted out and emptied as shown below: The spray nozzle is removable for cleaning and it is recommended that the unit and bowl are flushed out with a bleach solution periodically. Soap and towel dispensers are available accessories.

fitting optional soap & towel holder

Mounting your HANDEMAN on a vertical surface

The unit should be mounted on a suitable vertical surface with sufficient clearance to allow full use.

1. Use the mounting Template provided to drill 4 holes.
2. Remove the Waste-Safe tray by lifting vertically and then pulling towards you (see attached drawing).
3. Use the 4 holes in the Handeman body to insert screws through to the vertical surface and secure.

Thank you for purchasing this British made product. Please visit the Tealwash.com web site to view the whole range of Handeman, Tealwash and Cascade models and accessories.
